Input Text:

The global shift towards renewable energy sources is accelerating as countries seek to reduce carbon emissions and combat climate change. Innovations in solar, wind, and hydroelectric power are making renewable energy more efficient and cost-effective. Governments and organizations are investing heavily in green technologies to create sustainable energy solutions for the future.

Output Text:

The global transition to renewable energy is gaining momentum, driven by the need to reduce carbon emissions and tackle climate change. Advances in solar, wind, and hydroelectric power are enhancing efficiency and cost-effectiveness, with significant investments in green technologies.
